

# IQ Color

## THE FLEXIBILITY TO PRINT COLOUR VISUAL CUES ON DEMAND

Print colour labels on demand using Zebra's exclusive IQ Color direct thermal ink technology, and any Zebra® thermal printer.

IQ Color enables you to create visual cues or highlight important information — and do it as needed — within your current label format. This innovative technology provides a flexible, efficient and accurate alternative to such methods as using preprinted colour thermal media, laser or ink jet printing, separate colour labels, or colour markers.

### Customised to Your Needs

During label manufacturing, Zebra applies invisible ink colours to the zones you designate. Your printer heat-activates the ink to make select colours visible as your application requires. It can reveal the colour in the form of shapes, text, graphics or reverse images. Choose upto 8 colours plus black.

### Take a Cue from Colour with IQ Color. Typical Colour-Cue Applications Include:

#### Healthcare

- Lab
- Specimen
- Pharmacy order prioritising

#### Retail

- Markdown labels
- On sale labels
- Product attributes

#### Manufacturing

- Quality control
- Work in process

#### Transportation and Logistics

- Instructions for sortation
- Inventory management
- Shipping (e.g., RUSH)
